

SELECTION CORPORATE CLOTHING LIMITED

Environmental Policy

Selection Corporate Clothing understands and supports sustainable development and we will endeavour to design our business strategies with environmental concerns to the fore.

As a distributor with no manufacturing facilities we address environment issues primarily in our approach to design and distribution:

- Minimise the amount of packaging used.
- Design packaging for re-use, boxes used for product delivered to SCC are re-used to make shipments to customers.
- All of our packaging can ultimately be recycled.

SCC will comply with all existing and future legislative requirements and will encourage our suppliers to achieve high standards of environmental performance.
